# Begin your longarm quilting journey. Meet Larry.

Relentlessly pursue your quilting passion. Larry is APQS in its simplest, smallest and most economical form. When quilting feels effortless, creativity happens. Larry has all the features APQS is known for and is backed by the unmatched APQS lifetime guarantee. Now you can own an APQS longarm at a midarm price.

## What makes Larry special?

### Features that add exceptional value

Though Larry is smaller in size, it's not short on quality. From its beautiful stitches to the way it glides across your quilt, you'll find the same attention to detail as in all our quilting machines. Larry has the most compact footprint of all our machines and its simple controls make it ideal for starting your longarm journey.

### Multi-positional front handles

The handles on the front of Larry are independently adjustable up and down while also featuring tilting hand grips. You can adjust the handles to fit your quilting style and body type. Their ergonomic design lets you quilt longer with less fatigue. The handle design gives greater control to help you guide the machine with ease and provides excellent needle visibility.

### Standard table

The APQS Standard Table comes in 8- and 10-foot lengths (12-foot optional). No matter which size you choose, you'll enjoy time-saving features that make your quilting simple and fun. The quilt top, batting and backing all load from the top so you can easily change the bobbin, smooth out batting, or even sit as you quilt. Our tables do not have junction points in the rails, so the machine glides smoothly across the entire quilt. Two simple compression brakes hold the rollers in place, allowing you to independently adjust each quilt layer for smooth quilts.
